# The history of brewing company Krinitca

The history of brewing company "Krinitca" begins in 1975, when the factory produced its first beer. Every year, the company improved the recipes, upgraded equipment and created new beers. Nowadays "Krinitca" is the largest enterprise in the brewing industry of The Republic of Belarus.

Launched in 2003 and completed in 2010 large-scale modernization of production consisted of three stages. Major renovation has allowed the company to reach a new level and brew beer, which is comparable and even better than leading beer brands.

New quality standards and new production facilities have strengthened the leading position of "Krinitca". Today, the company is ready to brew up to 24 million decaliters a year. Brewery "Krinitca" does not only produce a wide range of beers -from light lagers to dark varieties of classic strong stouts, but makes soft drinks and kvass.

# Dear Friends!

Beer is a truly unique beverage. The number of its admirers and amateurs is enormous. And for every one of them beer embodies special values. Recognizing that we do not just perform as brewers, but become like-minded with our consumers.

Our venture is the largest venture of national brewing industry. It exists in constant dynamics, improves production methods and expands brand portfolio. We are a success both in premium and mainstream segments.

Producing new products we develop the general idea of Belarusian brewing industry opportunities and meet various consumer`s demands. That is exactly why our target audience is so broad and our products are so popular.

Best regards,  
JSC "Krinitsa"
