DOMOSTROENIE

COMMERCIAL OFFER OF THE BRANCH «DOMOSTROENIE»

Our young modern enterprise, founded on basis of RUE «Zavod gazetnoy bumagi» on 23rd of January 2009, using the newest technologies and equipment of leading European producers, such as «Homag», «Cathild», «Ledinek», «Hundegger» for production of molded products, glued laminated beam, frame-panel houses and glued laminated beam houses, responding to requirements and expectations of consumers, offers you cooperation:

OUR PRODUCTION

- 1. Frame-panel houses** [HTS codes 4418908000]
(GOST 1074-97STB 1722-2007, TU BY 790282162.001-2010): capacity of series production – 2000 square meters per month. Full set of the house includes all that is necessary for its montage: set of mounted walls and overlaps, window and door blocks, interior and exterior sheathing, floor board, rafter system, full set of hardware. Usage of modern heat-insulation materials allows to provide resistance of enclosing constructions not less than 6,11 m² °C/W.
- 2. Glued laminated beam houses** [HTS codes 4418901000]
(TU BY 790282162.004-2010, EN 14080): capacity of series production – 5-8 sets of glued laminated beam houses per month. While gluing of softwood lamellas, our enterprise uses certified glue AKZONOBEL, which got an approval of Norwegian, French and German institutes for production of bearing wooden constructions.
- 3. Glued laminated beam** [HTS codes 4418901000]
– selective timber of softwood, which is being cut, treated in drying cameras with soft regimes to relative humidity from 8 to 12%. Dried commodity is being planed from 4 sides to get precise sizes, sorted and glued on powerful hydraulic press to glued laminated beam of different sections.
 - ✓ Capacity of series production per year – 15 000 m³ multilayered glued beam;
 - ✓ Planed beam
[50*600*75-200 (h) mm; 50*350*200-300 (h) mm; 50-300*200-600 (h) mm];
 - ✓ Profiled beam [80-300*100-250(h) mm];
 - ✓ Maximum length of beam – 18 m.
- 4. Molded products** [HTS codes 4409101800]
(TY BY 790282162.003-2010): block-house, floor board, sheathing «imitation of beam», sheathing, planed board. Production capacity –23 650 m³ of molded products.
- 5. Sawn materials** [HTS codes 4407109100]
(GOST 17.13.2007)

- cut saw material – softwood board, edges of which are processed carefully;
- uncut saw material – softwood board with unprocessed edges. Edges are not sawn, or sawn partially, often in the edge areas you can see wood bark. Such unprocessed surface is called wane. Capacity of series production per year - 108 000 m³.

6. Softwood woodchip [HTS codes 4401210000]

– wood parts, produced in the result of grinding of wood commodity by chippers or special cutting devices in technological lines.

SALE AND DELIVERY CONDITIONS

- frame-panel houses and glued laminated beam houses: delivery conditions – FCA; terms of payment – full prepayment, partial prepayment; price of frame-panel houses is formed depending on price of spent materials, glued laminated beam houses – depending on quantity of beam cubes, used for production.
- glued laminated beam: packaging – packets in the film; delivery conditions – FCA;
- payment conditions – full prepayment;
- molded products: packaging – packets in the film; packet-2 m³- 4m\3 m³ - 6m. Delivery conditions – wagons, automobile, FCA. Payment conditions – full prepayment;
- sawn materials – packaging in packets (dried or compact) in packet 4m³ or 6m³, delivery conditions – wagons, FCA, DAF, Auto; payment conditions – full prepayment, partial prepayment.

COOPERATION EXPERIENCE:

RUE «Zavod gazetnoy bumagi» branch «Domostroenie» cooperates with different companies near and far abroad. We have experience of work with such countries as Russia, Italy, Latvia, Azerbaijan, France and etc.

We would be glad to cooperate with you!

RUE «Zavod gazetnoy bumagi» was the winner of the competition
«The best building material of the year -2013»

PRICE-LIST

№	name of the project	total area, m2	Price without VAT, EUR (FCA)	home kit	general view
1	Frame-panel house "Alexandria"	90, 2	22 612	set of panels, truss system, outer sheathing block-house, trim, floor board-27, wood casement windows, wooden interior doors	
2	Frame-panel house "Raduga"	171,76	27 564	set of panels, truss system, a set of of nails floor boards-27 drywall, wall paneling, wind farm board	
3	Frame-panel house "Kochanov"	115, 92	24 418	Set of panels, beams Frame of, attic door, 1 set of door unit set of wooden double-glazed windows, floor board-27, wind board, block house (B), plasterboard	
4	Frame-panel house "Alpha"	243, 38	47 600	Set of panels, set door blocks, window units set, oaken gates deaf board parquet array varnished oak, a set of metal products, block house in, floor board 27 (A), terrace	
5	Frame-panel house "Valdek"	56	9 991	Set of panels, wind board (B), wall paneling, mauerlat, lathing strut 150 * 150, waistrail of 1st floorafter 50 * 190	
6	Frame-panel house "Dribin"	205, 6	51 437	Set of panels, of door units set, a set of double-glazed windows, a set of of metal products, truss system, drywall, wall paneling, Details porch, block a house (B)	
7	Glued laminated beam house«Albion»	255, 3	40 768	timberofwall	
8	Glued laminated beam house«Viking»	62,83	15 392	timberofwall	

					
9	Glued laminated beam house «Prestig»	215	56 215	Timber wall 230 * 200; pillars rack, joists floor beams, rafter, stiffening rib, the binder board, fencing pillars	
10	Glued laminated beam house «Svetlana»	160	51 558	Timber wall 140 * 210 mm, timber wall 129 * 210 mm, timber wall 59 * 210, rafter, trimmer joists, beams 50 * 210 mm, planed board 150 * 45mm, 210 * 40 mm, timber of the siege 210 * 80 mm, waling 60 * 100mm, rack 200 * 200 mm	
11	Glued laminated beam house «Bjiorn»	131,9	29 548	Timber wall 220 mm, trimmer joists, rafter, screedrafterscounter-bar, crate, Block House (A)board wind, rack carcass	
12	Glued laminated beam house «Kashtan»	326,6	116 472	timber of wall	

***The foundation and construction works in the cost of these projects is not included.
