

1	<p><b>Full name of the humanitarian project</b> Information and communication technologies in the social sphere.</p> 
2	<p><b>Name of the Belarusian organization implementing the humanitarian project</b> State institution "Territorial center of social services for the population of the Brest region".</p>
3	<p><b>Name of the foreign partner, including co-executors (if any)</b> No</p>
4	<p><b>Brief description of the humanitarian project:</b></p> <ul style="list-style-type: none"> <li>• <i>what phenomena in society prompted the writing of a humanitarian project</i></li> <li>• <i>the urgency of the problems</i></li> <li>• <i>confirmation of relevance</i></li> <li>• <i>statistics, research</i></li> <li>• <i>field of activity</i></li> <li>• <i>for whom the project is designed, whose interests it defends</i></li> </ul> <p>The development of modern society in the 21st century is characterized by a transition to an information civilization, within which information and communication technologies receive priority development.</p> <p>The strategic task of developing the state social policy of the Republic of Belarus is to improve the quality and accessibility of the provision of social services, the effectiveness of the activities of social institutions.</p> <p>The Brest district consists of 11 village councils, on the territory of which more than 45 thousand people live.</p> <p>The State Institution "Territorial Center for Social Services for the Population of the Brest District" provides Social services to citizens who are in a difficult life situation - lonely, lonely living elderly citizens, people with</p>

disabilities, families raising children with disabilities, orphans left without parental care aged 18 to 23 years, citizens, returned from institutions of the penitentiary system, etc.

The State Institution "Territorial Center for Social Services for the Population of the Brest District" uses the resources of the official website, social networks, printing products (booklets, business cards, leaflets, memos) to inform citizens about the activities of the institution.

However, practice shows that there is a need to improve the forms of informing citizens about the social services provided and to increase the information accessibility of the institution. Experience shows that the official website, social networks of the institution are not the leading sources of information on the required list and scope of social services provided to the population. In addition, there is still a need to improve the computer literacy of the clients of the social service institution, especially the elderly living in rural areas. Also, not all senior citizens and people with disabilities have access to the Internet.

The installation of street kiosks-stands will allow posting up-to-date information about the activities of a social service institution, as well as preventive, informational and educational information, etc. Citizens at any time convenient for them will be able to receive the necessary information about social services, other types of social assistance and support, sign up for reception, leave feedback, apply for the provision of services, since the kiosks-stands are provided with access to the Internet. The most optimal placement of street kiosks-stands is seen near rural executive committees. In the administrative building of the Center, in order to increase information accessibility, it is necessary to install an interactive touch vertical stand that will display all information about the activities of the organization, including sample applications and lists of required documents. These stands meet the requirements of an accessible environment for people with disabilities. The existing stationary displays in the institution are limited by the available space and allow information to be displayed on just a few pages.

- social sphere

- the project is aimed at socially vulnerable categories of citizens

5

**Special purpose:**

- *General goals of the humanitarian project, corresponding to national interests, state programs, development prospects, plans and strategies, legislation and international obligations of the Republic of Belarus, as well as the goals specified in the Decree*
