Also, on March 22nd 2013, the Joint stock company "Gomeldrev" received the *FSC certificate*, which allows our company to sell our products in the European Union.

And also The Joint stock company "Gomeldrev" produces the complete *sets of panels for houses of frame type* on the hi-tech equipment of the firm "Mitek" (HS Code 9406002000). Frame systems are made from qualitative coniferous timber which is addiced, wood preservated and of chamber drying. Building of frame houses is one of the most perspective technologies of the low-rise building. As a heat-insulated materials is used the heater «PAROK». The thermal protection layer in 150 mm completely provides all-the-year-round comfortable residing. As wind and vapour protection are applied special vapour protection films. The design of the wall panels allows to mount the house operatively and without the large expenses. Houses of such type are assembled as a construction set by a brigade of 4-7 persons in a current of week. In wooden houses of a frame design, as well as in houses from a bar, a log and a brick, it is possible to install stoves or fireplaces. Such wooden frame houses are harmless, they combine the tested quality of natural materials with the advantage of application of scientific developments in building.

Nowadays we release *Plywood* for general purposes with outer layers of hardwood veneer (HS Code 4412320000). By the degree of water resistance we produce waterproof plywood. According to the degree of machining our plywood is subdivided into unsanded and sanded, produced from birch, alder, as well as the

grade of I / I to IV / IV. Netherlands companies with whom we have had a positive experience in cooperation on the sale of plywood – are International plywood, Neymann, Dragmire Trading. With these companies we would like to continue the cooperation.
